

ROBAM A829 - 36" Wall Mount Range Hood

Product Information

Feature

Dual-Core Absorber 5.0 Intellectual Change Of Frequency, Smooth Ventilation

*Patented electric motor mid-placed technology, lessening current loss caused by asymmetric structural current flow, higher efficient absorption.

*Innovative adoption of cyclone turbine, streamlined blades design, effectively decreasing absorption obstruction assuring more smooth ventilation channel.

*Logarithm volute casing design, widening the opening of volute casing, increasing fume exit area by 55%, enhancing ventilation more efficiently.

Large Wide Angle Deep Cavity

*Piloting upward fume with tornadic absorption.

*210mm deep cavity, holding huger quantity of fume, collecting upward fume in just seconds.

*Super large and 360 degree wide angle tornadic absorption, enhancing absorption by 1/3.

*Storm eye Storm principle, Zero pressure in center, Generating tornadic suction, leaving fume nowhere to stay.

“No-Disassembly And Wash Free” Inner Chamber “Eiffel” Integrated Oil-filter Screen

*Extreme punching craft, punch-formed at one time 14400 stainless diamond mesh more effective in separating the oil, strong efficient in filtering the fume.

*Brand new electrophoreses protection technology for inner cavity, nanometer oil-free coating one step clean protection, no residual for oil stain on inner cavity assuring constant strong absorption.

Digital Electric Motor

*Driving 100 thousand rotate per hour, generating 22m³/min peak level air.

*breaking through traditional range hood electric motor bottleneck, absorbing cooking fume in seconds, leaving clean kitchen with no fume.
